

# रेलवे भर्ती बोर्ड / RAILWAY RECRUITMENT BOARD

सी०ई०एन० ०८/२०२४ -7 वें सीपीसी वेतन मैट्रिक्स के लेवल १ में विभिन्न पदों हेतु

CEN 08/2024- Various Posts in Level 1 of 7th CPC Pay Matrix

|           |                      |
|-----------|----------------------|
| Test Date | 09/12/2025           |
| Test Time | 12:45 PM - 2:15 PM   |
| Subject   | RRB Level 01 Stage I |

## \* Note

Correct Answer will carry 1 mark per Question.

Incorrect Answer will carry 1/3 Negative mark per Question.

1. Options shown in green color with a tick icon are correct.

2. Chosen option on the right of the question indicates the option selected by the candidate.

## Section : General Science

|     |                                                                                                                                           |
|-----|-------------------------------------------------------------------------------------------------------------------------------------------|
| Q.1 | What is required to describe the distance an object has travelled?                                                                        |
| Ans | <input checked="" type="checkbox"/> A. Only the direction of motion                                                                       |
|     | <input checked="" type="checkbox"/> B. Both magnitude and direction                                                                       |
|     | <input checked="" type="checkbox"/> C. The starting and ending points only                                                                |
|     | <input checked="" type="checkbox"/> D. Only the numerical value, which is its magnitude                                                   |
| Q.2 | What is corrosion most commonly observed as?                                                                                              |
| Ans | <input checked="" type="checkbox"/> A. Rust formation on iron objects                                                                     |
|     | <input checked="" type="checkbox"/> B. Boiling of water in a kettle                                                                       |
|     | <input checked="" type="checkbox"/> C. Melting of metal when heated                                                                       |
|     | <input checked="" type="checkbox"/> D. Glowing of a bulb                                                                                  |
| Q.3 | The importance of genetic variation in organisms is that _____.                                                                           |
| Ans | <input checked="" type="checkbox"/> A. it increases the chances of survival of an organism                                                |
|     | <input checked="" type="checkbox"/> B. it gives rise to dominant and recessive traits                                                     |
|     | <input checked="" type="checkbox"/> C. it leads to uniformity in the progeny                                                              |
|     | <input checked="" type="checkbox"/> D. it enables sexual reproduction                                                                     |
| Q.4 | Which cell organelle is responsible for releasing energy in the form of ATP, which enables various metabolic functions in an animal cell? |
| Ans | <input checked="" type="checkbox"/> A. Endoplasmic reticulum                                                                              |
|     | <input checked="" type="checkbox"/> B. Mitochondria                                                                                       |
|     | <input checked="" type="checkbox"/> C. Lysosome                                                                                           |
|     | <input checked="" type="checkbox"/> D. Nucleus                                                                                            |
| Q.5 | What is 'suspension' in chemistry?                                                                                                        |
| Ans | <input checked="" type="checkbox"/> A. A heterogeneous mixture with large particles                                                       |
|     | <input checked="" type="checkbox"/> B. A colloidal dispersion                                                                             |
|     | <input checked="" type="checkbox"/> C. A homogeneous mixture                                                                              |
|     | <input checked="" type="checkbox"/> D. A true solution                                                                                    |

|      |                                                                                                            |  |
|------|------------------------------------------------------------------------------------------------------------|--|
| Q.6  | A 96 kg astronaut is standing on Earth. What is his weight on the Moon? (g on earth = $10 \text{ m/s}^2$ ) |  |
| Ans  | <input type="checkbox"/> A. 960 N                                                                          |  |
|      | <input checked="" type="checkbox"/> B. 160 N                                                               |  |
|      | <input type="checkbox"/> C. 16 N                                                                           |  |
|      | <input type="checkbox"/> D. 96 N                                                                           |  |
| Q.7  | Which of the following is NOT a consequence of the law of conservation of energy?                          |  |
| Ans  | <input type="checkbox"/> A. Energy can be converted from one form to another                               |  |
|      | <input type="checkbox"/> B. Total energy in a closed system remains constant                               |  |
|      | <input type="checkbox"/> C. Kinetic energy can convert into potential energy                               |  |
|      | <input checked="" type="checkbox"/> D. Energy can be created to increase total energy of a closed system   |  |
| Q.8  | Which component of phloem is basically responsible for the translocation of food?                          |  |
| Ans  | <input type="checkbox"/> A. Companion cells                                                                |  |
|      | <input type="checkbox"/> B. Phloem parenchyma                                                              |  |
|      | <input type="checkbox"/> C. Phloem fibres                                                                  |  |
|      | <input checked="" type="checkbox"/> D. Sieve elements                                                      |  |
| Q.9  | Which of the following conditions will most effectively accelerate the corrosion of iron?                  |  |
| Ans  | <input type="checkbox"/> A. Iron surface in dry air with no impurities                                     |  |
|      | <input type="checkbox"/> B. Iron coated with a thin layer of zinc (galvanization)                          |  |
|      | <input checked="" type="checkbox"/> C. Iron surface exposed to moist air containing dissolved salts        |  |
|      | <input type="checkbox"/> D. Iron immersed in pure water, free of dissolved oxygen                          |  |
| Q.10 | Which of the following hydrocarbons is saturated?                                                          |  |
| Ans  | <input type="checkbox"/> A. Propene                                                                        |  |
|      | <input checked="" type="checkbox"/> B. Butane                                                              |  |
|      | <input type="checkbox"/> C. Benzene                                                                        |  |
|      | <input type="checkbox"/> D. Butene                                                                         |  |
| Q.11 | The image formed by a convex mirror is always _____.                                                       |  |
| Ans  | <input type="checkbox"/> A. real and inverted                                                              |  |
|      | <input checked="" type="checkbox"/> B. virtual and erect                                                   |  |
|      | <input type="checkbox"/> C. real and erect                                                                 |  |
|      | <input type="checkbox"/> D. virtual and inverted                                                           |  |
| Q.12 | Which of the following particles contribute to the mass number?                                            |  |
| Ans  | <input type="checkbox"/> A. Protons only                                                                   |  |
|      | <input checked="" type="checkbox"/> B. Protons and Neutrons                                                |  |
|      | <input type="checkbox"/> C. Electrons only                                                                 |  |
|      | <input type="checkbox"/> D. Electrons and Protons                                                          |  |
| Q.13 | A body of mass 5 kg is moving with an acceleration of $2 \text{ m/s}^2$ . What is the force acting on it?  |  |
| Ans  | <input type="checkbox"/> A. 7 N                                                                            |  |
|      | <input type="checkbox"/> B. 2 N                                                                            |  |
|      | <input checked="" type="checkbox"/> C. 10 N                                                                |  |
|      | <input type="checkbox"/> D. 5 N                                                                            |  |

|      |                                                                                                                                                     |  |
|------|-----------------------------------------------------------------------------------------------------------------------------------------------------|--|
| Q.14 | The main purpose of the earth wire in a domestic circuit is:                                                                                        |  |
| Ans  | <input type="checkbox"/> A. to reduce resistance                                                                                                    |  |
|      | <input type="checkbox"/> B. to supply current                                                                                                       |  |
|      | <input checked="" type="checkbox"/> C. to protect from electric shocks                                                                              |  |
|      | <input type="checkbox"/> D. to increase voltage                                                                                                     |  |
| Q.15 | Which of the following devices does NOT use the heating effect of current for its working?                                                          |  |
| Ans  | <input type="checkbox"/> A. Electric Fuse                                                                                                           |  |
|      | <input type="checkbox"/> B. Electric Iron                                                                                                           |  |
|      | <input checked="" type="checkbox"/> C. Electric Mixer Grinder                                                                                       |  |
|      | <input type="checkbox"/> D. Electric Geyser                                                                                                         |  |
| Q.16 | Hormone named testosterone is secreted from which of the following parts of a human being?                                                          |  |
| Ans  | <input checked="" type="checkbox"/> A. Testis                                                                                                       |  |
|      | <input type="checkbox"/> B. Uterus                                                                                                                  |  |
|      | <input type="checkbox"/> C. Fallopian tube                                                                                                          |  |
|      | <input type="checkbox"/> D. Ureter                                                                                                                  |  |
| Q.17 | Which property of a carbon atom enables one carbon atom to form bonds with other carbon atoms?                                                      |  |
| Ans  | <input type="checkbox"/> A. Valency                                                                                                                 |  |
|      | <input type="checkbox"/> B. Polymerisation                                                                                                          |  |
|      | <input checked="" type="checkbox"/> C. Catenation                                                                                                   |  |
|      | <input type="checkbox"/> D. Isomerisation                                                                                                           |  |
| Q.18 | A village that regularly suffers from drought wants to store water for dry seasons to irrigate the agricultural field. Which method will help most? |  |
| Ans  | <input type="checkbox"/> A. Spraying pesticides                                                                                                     |  |
|      | <input type="checkbox"/> B. Sprinkler irrigation                                                                                                    |  |
|      | <input type="checkbox"/> C. Growing short-duration crops                                                                                            |  |
|      | <input checked="" type="checkbox"/> D. Rainwater harvesting and watershed management                                                                |  |
| Q.19 | What is the range of the pH scale?                                                                                                                  |  |
| Ans  | <input type="checkbox"/> A. -1 to 14                                                                                                                |  |
|      | <input checked="" type="checkbox"/> B. 0 to 14                                                                                                      |  |
|      | <input type="checkbox"/> C. 0 to 7                                                                                                                  |  |
|      | <input type="checkbox"/> D. 0 to 10                                                                                                                 |  |
| Q.20 | A student places an object at a distance greater than twice the focal length from a convex lens. What kind of image is formed?                      |  |
| Ans  | <input type="checkbox"/> A. Real, inverted, and larger than the object                                                                              |  |
|      | <input type="checkbox"/> B. Virtual, erect, and smaller than the object                                                                             |  |
|      | <input checked="" type="checkbox"/> C. Real, inverted, and smaller than the object                                                                  |  |
|      | <input type="checkbox"/> D. Virtual, erect, and larger than the object                                                                              |  |

|      |                                                                             |  |
|------|-----------------------------------------------------------------------------|--|
| Q.21 | What is the advantage of fragmentation as a mode of reproduction in plants? |  |
| Ans  | <input checked="" type="checkbox"/> A. Promotes bud formation               |  |
|      | <input checked="" type="checkbox"/> B. Forms spores for dispersal           |  |
|      | <input checked="" type="checkbox"/> C. Brings about rapid multiplication    |  |
|      | <input checked="" type="checkbox"/> D. Increases genetic diversity          |  |

|      |                                                                                                                                                    |  |
|------|----------------------------------------------------------------------------------------------------------------------------------------------------|--|
| Q.22 | How does the Mimosa pudica (touch-me-not) plant transmit the touch stimulus from the point of contact to the motor cells responsible for movement? |  |
| Ans  | <input checked="" type="checkbox"/> A. By releasing hormones that travel through specialised tubes                                                 |  |
|      | <input checked="" type="checkbox"/> B. Through specialised nerve tissues connecting the points                                                     |  |
|      | <input checked="" type="checkbox"/> C. Through electrical and chemical signals passed between general plant cells                                  |  |
|      | <input checked="" type="checkbox"/> D. Through growth of new supportive cells at the touch site                                                    |  |

|      |                                                  |  |
|------|--------------------------------------------------|--|
| Q.23 | Leucoplasts have which of the following colours? |  |
| Ans  | <input checked="" type="checkbox"/> A. White     |  |
|      | <input checked="" type="checkbox"/> B. Orange    |  |
|      | <input checked="" type="checkbox"/> C. Indigo    |  |
|      | <input checked="" type="checkbox"/> D. Purple    |  |

|      |                                                                                                     |  |
|------|-----------------------------------------------------------------------------------------------------|--|
| Q.24 | A sound of 100 Hz is compared with a sound of 500 Hz. Which of the following statements is correct? |  |
| Ans  | <input checked="" type="checkbox"/> A. 500 Hz sound has a higher pitch.                             |  |
|      | <input checked="" type="checkbox"/> B. Pitch cannot be compared.                                    |  |
|      | <input checked="" type="checkbox"/> C. 100 Hz sound has a higher pitch.                             |  |
|      | <input checked="" type="checkbox"/> D. Both have the same pitch.                                    |  |

|      |                                                                                   |  |
|------|-----------------------------------------------------------------------------------|--|
| Q.25 | What is the correct definition of atomic mass?                                    |  |
| Ans  | <input checked="" type="checkbox"/> A. It is the mass of one atom in kilograms.   |  |
|      | <input checked="" type="checkbox"/> B. It is the mass of one hydrogen molecule.   |  |
|      | <input checked="" type="checkbox"/> C. It is the mass of an atom in grams.        |  |
|      | <input checked="" type="checkbox"/> D. It is the mass relative to carbon-12 atom. |  |
